CORNING

CellBIND® HYPERFlask® M Tissue Culture Vessels

High Yield **PER**formance Flask **M**anual (HYPERFlask® M) cell culture vessel, designed especially for manual use. Increase cell yield – 10-fold higher cell yield increases productivity and capacity, and reduce processing time and incubator storage space by handling one flask compared to 10 traditional 175cm² flasks.

- Smooth texture on liner cap allows more ergonomic closing and opening of vessel by operator
- Adaptor grid allows for faster filling and emptying while reducing foam generation
- Each individual flask is traceable by a serial number that can be read by the unaided eye or by a handheld barcode reader
- Made with USP Class VI Materials – moulded and assembled in a Certified Class 100,000 clean room
- Sterile – gamma irradiated to Sterility Assurance Level (SAL) 10⁻⁶
- Clean room packaging – each pack is double bagged
- 10 interconnected polystyrene growth surfaces

Corning® TC-Treated Cellware

CORNING

TC-treated products are surface modified by corona discharge or gas plasma treatment which leaves the surface hydrophilic and negatively charged with the addition of media.

- For everyday attachment cell culture needs
- High quality and optically clear polystyrene
- Sterilised by gamma irradiation
- Certified non pyrogenic
- Printed with lot numbers for ease in traceability
