

GETINGE Lancer ULTIMA Series Labware Washing Systems

GETINGE Lancer ULTIMA series washers meet space and budget requirements in laboratories performing a range of critical applications where clean labware is essential.

The exclusive fully programmable Prolux microprocessor controller commands a full range of prewash, wash, rinse and drying functions through simple touchscreen menus on all ULTIMA series washers. The convenience of five preset programs for light to heavy loads simplifies operation, and now comes with the inclusion of a new pre-programmed "eco-cycle" for those loads which need cleaning with the least demand on valuable resources. Full details and specifications for individual models can be found below.

As standard with the GETINGE Lancer range, all units are delivered to point of use, installed by qualified OEM engineers, commissioned to GETINGE Lancer standards, and supplied with FREE chemical starter pack, FREE first year service contract and 12 months warranty as standard.

ULTIMA Undercounter Washers

The ULTIMA series undercounter washers offer 3 high-performance models that offer a range of efficient labware loading options using baskets and injector racks. The compact footprint maximises valuable research space.

	810LX	815LX	820LX
