

Whatman™ 4 Chr Chromatography Paper

cytiva
Whatman

- Ideal for routine and/or repetitive chromatography when loadings are relatively low
- Manufactured and tested specifically for chromatographic techniques to ensure the wicking capability and uniformity of capillary action that are important in chemical separations
- Very suitable where speed is important and very high resolution is not required
- Pure cellulose produced entirely from the highest quality cotton linters with no additives of any kind
- Also widely used in protein and nucleic acid blotting
- Smooth surface with 0.21mm thickness
- Flow rate 180mm/30min
- Fastest of the thin papers
