PRESEPT™ Disinfectant Tablets/Granules

- Complete biocidal spectrum based on the unique action of NaDCC (troclosene sodium)
- Granules contain and solidify spillages, avoiding further contamination spread, the formulation ensures a very high concentration of available chlorine and the effervescent action ensures mixing of the disinfectant with the spillage
- Tablets have better activity in the presence of organic matter than hypochlorite and may be used with confidence for all body fluid spillages with a controlled concentration
- For use on plastic, porcelain, rubber, glass and steel
- Protection against all organisms including MRSA, HIV, Hepatitis B and Herpes viruses
- Bactericidal against Gram negative and Gram positive bacteria

Code	Description	Pack	Price
