

Mettmert ICHeco Climate Chambers Continued

Code	Model	Capacity, L	Int Dims*, w x d x h, mm	Ext Dims**, w x d x h, mm	Price
CHA1100	ICH110eco	108	560 x 400 x 480	745 x 585 x 1233	£9231.00
CHA8500	ICH260eco	256	640 x 500 x 800	824 x 685 x 1552	£13629.00
CHA8504	ICH750eco	749	1040 x 600 x 1200	1224 x 785 x 1950	£18137.00

* Interior dimensions: depth less 33mm for fan

** Exterior dimensions: depth without door handle, depth of handle 56mm

Cole-Parmer® Digital Colony Counter

Cole-Parmer

Registers a count each time you press a felt tip marker to the Petri dish. Adjust the pressure required to measure a count - suitable to each user. Sub-stage illumination is provided by energy saving, bright LEDs for glare free observation. Enhance counting of translucent or difficult to see colonies with the supplied black background filter.

- Can be used with 50 to 90mm Petri dishes
- Compatible with felt tip markers for pressure sensitive counting
- Antimicrobial coating provides additional protection
- Audible count confirmation, adjustable pressure sensitivity, and option for light/dark background increases flexibility
- Digital display of cumulative count (confirmed by an audible tone)
- Calculate the average colony count over multiple plates using the averaging facility
- Count results and statistics can be sent directly to a printer or computer
- Includes black background filter, 2 x Wolffhuegel graticules, 2 x 50 to 90mm dish centering adapters, and both UK and Shuko power plug adapters
- Magnifiers sold separately

Code	Alt Ref	Model	Dims, w x d x h, mm	Weight, kg	Price

Magnifiers

Code	Alt Ref	Model	Magnification	Price
COL3222	14212-60	SC6/1	x1.7	£72.00
COL3223	14212-61	SC6/1/3	x3	£87.00

Synbiosis AutoCOL Fully Automated Colony Counting System

A fully automated colony counting system, enabling walk away, accurate, traceable colony counts every time. Featuring an integrated plate feeder, colony counter and software based on ProtoCOL technology, an AutoCOL can automatically remove your plate lids and count colonies on up to one hundred 90mm plates in under an hour. With intuitive touch screen software you connect to AutoCOL via USB, you can easily set up automatic plate reads and optimise batch design for each plate type. You can set user access levels and even set up pass/fail limits. Combining unique three colour lighting and a sensitive camera, you'll capture full colour images of all microbial colony types, to generate precise, reproducible counts.
