

Flystuff Nutri-Fly® Formulations

Quality ingredients in standard formulas used by some of the largest fly facilities in the world. Strict lot traceability procedures are employed to each ingredient in every batch, ensuring consistency and quality. Convenient but also robust, and guaranteed to make fresh and substantive food throughout its shelf life. With several different formulations, there is a Nutri-Fly® to meet your needs:

1. Bloomington formulation: based on the standard recipe used at the Bloomington Drosophila Stock Centre, and adopted by major Drosophila media prep facilities worldwide. Ingredients: yellow cornmeal, agar (type II), corn syrup solids, inactive nutritional yeast, soy flour.

2. Molasses formulation: a new recipe available in a pre-packaged dry form. This media is perfect for media preparation facilities and labs requiring a molasses based media. Ingredients: cornmeal, agar (type II), molasses solids, inactive nutritional yeast.

3. Instant formulation: accommodates the requirement of labs without the ability to cook traditional Drosophila media or for labs making very small amounts (<1L) of Drosophila media at a time. Easy to make - just add equal parts instant media and water. Ingredients: potato flakes, dextrose, brewer's yeast, Tegosept.

Code	Alt Ref	Description	For	Pack	Price
FLY1034	66-112	Bloomington formulation	10L food	10 x 1L packets	£130.00
FLY1004	66-113	Bloomington formulation	100L food	10 x 10L packets	£648.00
FLY1340	66-121	Bloomington formulation	100L food	Superbulk 100L powder	£387.00
FLY1140	66-116	Molasses formulation	10L food	10 x 1L packets	£130.00
FLY1286	66-114	Molasses formulation	100L food	10 x 10L packets	£639.00
FLY1344	66-123	Molasses formulation	100L food	Superbulk 100L powder	£542.00
FLY1188	66-117	Instant formulation	1L food	1L packet	£27.80

Flystuff Nutri-Fly® Grape Agar Powder Premix Packets

Contains all necessary ingredients to make your Drosophila embryo collection plates. Grape agar packets are super easy and quick to make - simply add water and make in the microwave, autoclave or on a hot plate. They use high quality extract from concord grapes and top grade agar to ensure your flies lay the most egg beds. Multiple batches from every single lot are rigorously tested to ensure your plates come out perfect each and every time. Ingredients: concord grape crystals, grape skin extract, sucrose, agar, Tegosept.

Flystuff Nutri-Fly® Drosophila Agar

Moorehead-style agar which can be used interchangeably with recipes calling for standard, food-grade agar. Gelidium agar has a low gelling temperature, so it is great for media containing antibiotics. It doesn't contain trace metals, soluble carbohydrates, carbohydrates or any spores that would inhibit bacterial growth, making it an exceptional medium for research projects. 100 mesh particle size. Lot-to-lot quality control processes assure consistency in your fly food. Technical grade agar.

Code	Alt Ref	Pack	Price
FLY1020	66-105	5kg	£585.00
FLY1298	66-104	10kg	£1171.00
FLY1300	66-105	25kg	£2838.00
FLY1302	66-111	50kg	£5115.00
