

Buchi R-300 Rotavapors®

Meets the highest expectations in convenience and versatility for rotary evaporation. Its modular design allows for easy extension of the R-300 to a fully integrated system where a central interface regulates each component.

- Comfortable flask and vapor duct removal thanks to easy to use Combi-Clip
- User friendly operation due to ergonomic electric or manual lift
- Immediate adjustment of heating temperature and rotation speed with intuitively positioned control knobs
- Easy plug and play extension to a fully integrated system including a central interface, vacuum pump and recirculating chiller according to your needs
- Choice between the B-301 1L fast heating bath or B-305 5L high temperature bath
- Precise operation control with integrated digital display of heating temperature, rotation speed and lift position
- Traceability of all process parameters including data recording and charting (with Interface I-300 Pro only)
- Instant alert with push notification on mobile devices in case of process deviation (with Interface I-300/I-300 Pro only)

Stand Alone Configuration

- Available with either an electronic or manual lift
- Vertical or cold trap glass assembly (including receiving flask)
- Can optionally include the B-301 or B-305 heating bath
- Supplied without interface
- SJ 29/32 (including evaporating flask, vapor duct)

Code	Alt Ref	Glass Assembly	Lift System	Heating Bath	Price
EVA1030	11R300111V001	Vertical	Manual	B-301	£3490.00
EVA1032	11R300211V101	Vertical	Electronic	B-301	£3897.00
EVA1034	11R300211C101	Cold trap	Electronic	B-301	£4142.00
EVA1036	11R300151V001	Vertical	Manual	B-305	£3676.00
EVA1038	11R300251V101	Vertical	Electronic	B-305	£4078.00
EVA1040	11R300251C101	Cold trap	Electronic	B-305	£4329.00

System Configuration

- Electronic or manual lift system
- Bundled with the V-300 vacuum pump
- Controlled by the I-300 or I-300 Pro interface, the central control unit for all process parameters with Woulff bottle (incl. VacuBox)
- Optional F-305 recirculating chiller
- SJ 29/32 (including evaporating flask, vapor duct)
- Protective coating P+G on the condenser and receiving flask
- All accessories and connections are included for out of the box usage
