

## Sartorius Cellulose Nitrate Membranes

SARTORIUS

Cellulose nitrate membrane filters are indicated for many general laboratory applications where a membrane with a high non-specific adsorption is suitable. They are hydrophilic and have high flow rates thanks to their symmetric structure.

- Compatible with aqueous solutions (pH 4 - 8), hydrocarbons and several other organic solvents
- Thickness: 130µm

## Sartorius Cellulose Acetate Membranes

SARTORIUS

Cellulose acetate membranes combine high flow rates and thermal stability with very low adsorption characteristics, and are therefore excellently suited for use in pressure filtration devices. They are hydrophilic and have high flow rates thanks to their symmetric structure. The 0.2µm membrane is the filter of choice for sterile filtration of aqueous solutions, such as nutrient media, buffers and sera.

- Compatible with aqueous solutions (pH 4 - 8), oils, alcohols and other organic solvents
- Thickness: 120µm

Supplied in packs of 100
