Eppendorf CellXpert® C170i Incubators

eppendorf

Ensures the reproducibility of experiments by minimising atmospheric fluctuations inside the incubator. CellXpert® incubators achieve this with fast feedback sensors, advanced microprocessor control of gas inlet valves, and individually-controlled heating circuits in every wall (6-sided direct heating). Fast circulation and mixture of the atmosphere is ensured by powerful natural convection caused by temperature gradients in the heating circuits. The intuitive, clearly arranged touch screen user interface ensures easy and full control over setting of parameters, monitoring, and documentation. The 180°C High Temperature Disinfection (HTD) that comes as standard on the CellXpert® C170i ensures a high level of contamination protection.

• Intuitive touch screen for fast, easy, and complete control
• Easy access USB ports for fast data export and documentation
• Robust new handle design for comfortable, low stress door opening
• Up to 25% more space: fan-less design, smart racking system and innovative insulation concept
