OHAUS MB23 Moisture Analyser

The MB23 provides precise moisture content determination at an unbeatable value. It uses glassless infrared heating, which increases efficiency for faster results. With a large backlit LCD display, standard RS232 port, 110g capacity and a readability of 0.01g/0.1% the MB23 offers moisture analysis for any budget.

- Glassless infrared heating increases efficiency for faster results
- User friendly touch button design for easy operation
- Compact design suits any workspace
