

Motic SMZ-161 Series Stereo Microscopes

Motic®

Convincing optical performance, combined with a small footprint and robust mechanics, makes the SMZ-161 the ideal stereo microscope for teaching in laboratories. Greenough zoom optical system, 45°, 360° rotating inclined head with widefield eyepieces WF10X/20mm with diopter adjustment on both eyepiece tubes (50 – 75mm), zoom system ratio 6:1, standard working distance 110mm, 3W LED with intensity control for incident and transmitted illumination, black/white and frosted stage plates and dust cover.

Code	Alt Ref	Description	Price
MIC1588	1100201300062	SMZ-161-binocular LED	£835.00
MIC1590	1100201300082	SMZ-161-trinocular LED	£897.00

Motic SMZ-171 Series Stereo Microscopes

Motic®

A versatile stereo microscope platform for biological and medical preparations to industrial quality control and inspection. Greenough zoom optical system, 45° inclined binocular or trinocular head with widefield adjustable eyepieces N-WF10X/23mm with diopter adjustment, ±5 diopter on both eyepiece tubes (52 – 75mm), zoom system ratio 6.7:1, standard working distance 110mm, transmitted light with tilting reflector (oblique illumination). Black/white and frosted glass stage plates and dust cover.
