Simport® Scientific StainTray™ Slide Staining Systems

- Suitable for routine staining requiring a humid chamber, haematology, cytology, and microbiology techniques
- Tough ABS black plastic base which will withstand a wide range of chemicals
- Will accept 10 or 20 slides on four plastic rails covered with a polymer strip
- Manipulation is made safe and easy by using only one hand
- When humidity is needed, wells between rails will hold up to 1mL of water without splashing, middle wells will hold up to 2mL
- Rails are raised to avoid water touching the slides and make them easily retrievable
- Base will also hold excess stain solution dripping from the slides
- Four rubber feet ensure greater base stability
- Stackable to help maximise storage space
- Drain plug can be removed to empty the StainTray™
- Two lids are available: clear PETG lids which allow for visual examination with a temperature range of –20 to 60°C, or black ABS lids for fluorescence work with a temperature range of –80 to 80°C
