### Dependaplast Washproof Plasters

Flexible PE plastic film is used to ensure a super-thin, flexible, washproof plaster. The membrane is moisture vapour permeable, allowing the skin to breathe without the need for physical perforations, whilst acting as a complete barrier to water, virus, bacteria and fungi. High tech acrylic adhesive provides a secure fixing, but is skin friendly and low allergy. Available in boxes with a perforated top for easy access, predominantly used in BS8599-1 compliant first aid kits. Assorted sizes.
