Cole-Parmer® Stuart™ Refrigerated incubator with orbital shaker – SI600C

The Cole-Parmer® Stuart™ SI600C incubator with an integrated orbital shaker, is ideal for cell culturing procedures. Angle adjustable accessory racks with the Magnalock coupling systems can be incorporated to increase versatility.

The units offer a maximum temperature of 60°C; and when combined with the SRC5 recirculating cooler, or equivalent, can operate at 15°C below ambient (minimum of 5°C), making it suitable for low-temperature applications, such as cell-based protein expression.

The compact units do not take up much space on the lab bench and have an integrated timer and digital display for speed and temperature. Every incubator comes with BioCote® antimicrobial protection and a three year warranty.
